Cold Chain Logistics Solutions

BDP Fresh Solutions

About BDP Fresh Solutions

BDP offers industry-leading cold chain solutions, including end-to-end temperature management, shipment visibility, and strict conformance to regulatory guidelines for transportation of your perishable cargo. Our team has the experience and the expertise your supply chain demands to safeguard the integrity of your products from door-to-door.

Industry Challenges

The industry ecosystem is inherently complex and made more challenging with stringent regulations and the need for impeccable product integrity. Maintaining cold chain product integrity across the entire supply chain demands rigorous processes and cold chain expertise. Total visibility is absolutely critical for companies in the industry, and while cost is always important, it must be balanced by other necessities such as quality, compliance, and risk management.

In this environment, companies require a global supply chain partner who understands these needs and provides the solutions necessary to meet the demands. These solutions must include product visibility, compliance, risk mitigation, security, and inventory and temperature control.

The BDP Experience

With over 50 years of experience, BDP is a trusted supply chain partner. We work with our customers to deliver a greater level of control, visibility, compliance.

Our team of experts offer a risk analysis approach of your door-to-door transport requirements, increasing control and reducing uncertainties. We are proud to offer customized supply chain solutions, tailored to the needs of our customers, including temperature regulation, packaging solutions, and security monitoring.

We also offer the industry's leading suite of technology, bringing unprecedented visibility to your supply chain.

Deliver what matters to you and your customers, safely:
