

Retail & Consumer Goods

Industry Challenges

Retailers are under tremendous pressure to remain ahead of consumers' constantly evolving spending behaviors and maintain control of their supply chain. In this ever changing environment, retailers face the need to support omni-channel demands, satisfy import compliance requirements and offset associated costs.

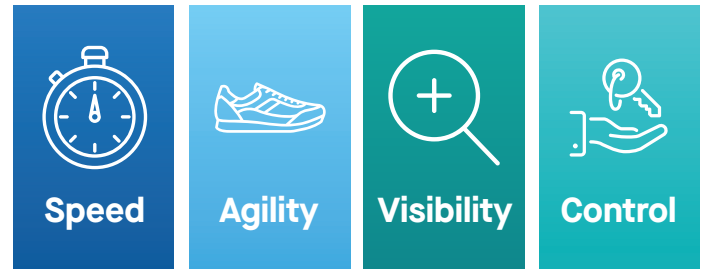

Now more than ever, retailers need top of the line visibility and control to stay ahead of the curve.

“BDP’s dependability, plus their familiarity with our product, needs, and operations, has proven invaluable.”

-Leading Consumer Goods Manufacturer

The BDP Experience

At BDP, we ensure your upstream supply chain is seamless. We are here as a partner to help you deliver services for your customers, and are dedicated to bringing you:

We understand that better visibility is key. We are proud to offer the industry's leading technology and the most dedicated and experienced team to ensure seamless flow and compliance for your business.

We help our clients develop and execute process improvements that optimize global trade, find cost-effective solutions that make a difference, and ensure adherence to the strict compliance of government regulations.

Visibility is key. Now more than ever, retailers need top of the line technology and control to stay ahead of the curve.

Innovation

BDP|SMART SUITE

BDP's leading edge technology provides the visibility and certainty needed to put you firmly in control of your international order to cash cycle.

BDP|SMART RETAIL

BDP Smart Retail® is a global shipment visibility tool for documentation management, exception management, process control and compliance. With Smart Retail®, customers can instantly view their sensitive documents,

track inventory, and rely on up-to-date information on global rates, booking requests and vessel schedules.

BDP|SMART VU

BDP Smart Vu® is your all-inclusive solution to vendor management and supplier logistics. Smart Vu® allows you to gain visibility into your processes and cash flow, manage each stage of the

supply chain, track milestones and optimize container utilization to increase savings and create unparalleled measurable value for your company.
