

GROWING BETTER. GROWING STRONGER.

BDP has a new strategic plan! Here's what that means to our valued customers.

Key focus areas

What it means for our customers

OUR FOUNDATION

Since the beginning, BDP has remained passionate about the customer experience, investments in our future, and the integration of technology. We continue to focus on customer needs, competitive service advantages and reduced supply chain costs.

PERFORMANCE

We are determined to deliver superior service to our customers with the highest regard for regulatory compliance, risk management and ethical business practices. Furthermore, it is our goal to operate efficiently and effectively in all phases of our business.

INNOVATION

We are committed to constantly innovating by evaluating and implementing new and emerging technologies such as artificial intelligence, robotic process automation, predictive tracking, and integrated analytics solutions to optimize your supply chain.

THOUGHT-LEADERSHIP

By nature, the world of supply chains is volatile; an ever-changing global economy, shifting regulations and evolving trade patterns provide for unprecedented levels of uncertainty. As such, offering top-notch educational content and events to keep our customers informed is among BDP's cornerstone values.

OUR PEOPLE

By continuing to invest in employee performance and development programs, BDP will equip our people to solve complex problems for the future, and increase organizational agility and engagement to foster an environment for continuous improvement and innovation.

CUSTOMER DELIGHT

Our new strategic plan focuses on delivering an enhanced, personalized customer experience. BDP is expanding our range of service offerings to provide customers with the in-depth metrics and forecasting solutions that the market demands.
